Give a Little, Take a Little

[Barbara Mandrell](#)

You've got to give a little, take a little if you want to get a little lovin'
And do all the things that make your man feel right
And if you give a little, take a little then you're gonna get a lotta lovin'
And you're never ever gonna have to spend another lonely nightIf he needs a little lovin' then hold him
'Cause if you don't, the fires of love are gonna get a little cold and dim
And if his day don't go your way then take it with a little smile
After all it's the ups and downs of love that make it all worthwhileYou've got to give a little, take a little if you want to get a little lovin'
And do all the things that make your man feel right
And if you give a little, take a little then you're gonna get a lotta lovin'
And you're never ever gonna have to spend another lonely nightNever mind the times when his feet feel the need for freedom
Just as long as they bring him on home to you when you need him
To show you care, you gotta be there when he laughs or when he cries
There's no mistaking givin' and takin' is the very best part of lifeYou've got to give a little, take a little if you want to get a little lovin'
And do all the things that make your man feel right
And if you give a little, take a little then you're gonna get a lotta lovin'
And you're never ever gonna have to spend another lonely nightYou've got to give a little, take a little if you want to get a little lovin'
And do all the things that make your man feel right
And if you give a little, take a little then you're gonna get a lotta lovin'
