

Rain

40 Below Summer

It's cold, it's hard and I'm locked inside this
I've gone too far, I can't rectify this
I walk away falling into
It's such a shame how I'll miss you
I feel shot, can you reach me?
You cannot bring me back
And I'll always sink into nothing
And I'm on my knees again
And I can't believe that it's always
Under my skin

Don't leave me out, leave me hanging
Don't keep me down, down and dragging
You're so sure that I won't splinter
You're so good, you're so good
Shift time to come back in line
Cause when I tried to embrace my life
Gonna dry up was it something you're fed
Got you sickened was it something I said
All it did was rain
