Beam Me Up

A Telemetry

every path I follow
somehow someway
someone's in my way
every land I travel
anywhere someone's in my face

take me away - take me away
to a place where I can breath

beam me up scotty
take me outer here

freedom is my essence
anyhow anyway
anyone can take
movement is frustration
so slow to go to my hiding place

hurry my way - hurry my way
to a world where I am free

beam me up scotty
take me outer here

to another place - another dimension
so far away from all I know

to another time - a world of essence
take me on my way

anger leads to madness
so long so hard
so much to take
world of suffocation
choking you smoking me
broken down to our knees

give me release - give me release
from this manic place I see

beam me up scotty
take me outer here
