

# The Longest Night

## Truss

You know a love so fine, so high above  
Goes on forever but the road is rough  
Reaching for another as truth will show  
Try to live without it but you can't let go  
We don't talk about it, we got no doubt  
We can love each other when the lights go out  
I got nobody, my bird has flown  
Anyone can see I'm walking alone, walking alone  
In your quiet moments, in your silent prayer  
I'll be with you baby, I'll be there  
In your darkest hour, on your longest night  
I'll be with you baby, make it right  
On your longest night  
You know it breaks my heart and it hurts my pride  
To know I lost you to the world outside  
Feelings when you touch me, they rise and fall  
Try to live without it, ain't no love at all  
We don't talk about it but somebody knows  
We can love each other when the candle glows  
Open my eyes and the moment is gone  
Anyone can see I'm walking alone, walking alone  
In your darkest hour, on your longest night  
I'll be with you baby, make it right  
Nobody cries, nobody cries, cries  
For the pain I feel  
Nobody knows, nobody knows  
And it makes me wanna die  
In your quiet moments, in your silent prayer  
I'll be with you baby, I'll be there  
In your darkest hour, on your longest night  
I'll be with you baby, make it right  
On your longest night  
Oh baby, so in love with you  
It could be your longest night  
Gonna be here all night, standing all night  
Be your longest night  
Gonna be here all night, standing all night, tonight  
Gonna be here all night, standing all night  
Gonna be here all night, standing all night

Gonna be here all night, standing all night  
Be your longest, longest, longest night  
Gonna be here all night, standing all night  
Gonna be here all night, standing all night  
Gonna be here all night, standing all night
