

Better Days

Supertramp

Trust me, I can help you
Feel free, we can save you
Join us in the good life
And better days, better days Campaign for the new life
Champagne and the bright lights
Make way for the right way
Better days, better days You didn't realize about the other life
That we can give you
We'll open up your eyes and make you see
The light that's all around you We'll help you work it out
And then you'll never doubt
Our intuition, our vision
Our decision, our mission, so listen No war and no inflation
No more desperation
You'll see, we can show you
Better days, much better days No hunger, higher wages
Good schools and smiling faces
Make way for the new way
And better days, better days We're gonna lead you down
To where the sun is always brightly shining
We'll push away the clouds and show you
There's a gold and silver lining We'll take away the pain, you'll want to try again
You won't be sorry, don't worry, don't worry
Yeah hurry, yes hurry, yeah hurry
Yeah, you better start coming, [Incomprehensible] join me
