

Only You

[Lisa Ekdahl](#)

Only you
Can make me feel
The world can disappear Only you
Make my heart heal
And make it oh so clear We can talk in circles
Going round in a million ways
And never understand 'Cause our words are whispers
Hidden up in a distant haze
Like diamonds next to sand I don't even know
What it's all about
But i get all blissed out
And then i know
It's only you
