Is It Cold In Here

Joe Diffie

There's something wrong, Lord I'm feeling it too
That runs through my heart like a torch cuts through steel
You haven't said a word, are you feeling it too
Is it cold in here or is it just youDid I leave the door wide open and let the chill just kill that old desire
Should I put my arms around you or put another log on the fire
Is it my imagination or did the temperature just drop a notch or two
Is it cold in here or is it just youThere's no warmth at all when I try to hold you near
You stare into space as if I wasn't here
Did our love just die or is it just about to
Is it cold in here or is it just youDid I leave the door wide open and let the chill just kill that old desire
Should I put my arms around you or put another log on the fire
Is it my imagination or did the temperature just drop a notch or two
Is it cold in here or is it just you, oh is it cold in here or is it just you
