

# Time to Share

## Gemini

(Verse 1)

It's gettin' hard to tell  
The months from weeks  
But I can still remember  
The words you whispered me  
And we'll be separated  
By a thousand dreams  
And if I listen closely

You'll be singin' in the wind And I can hear you sing (Verse 2)

And I take midnight walks  
When I cannot sleep  
I see those stars reflectin'  
Like diamonds out of reach  
And I know you're the one  
The only one for me

So I'll take the roads that bring me home

Back safe eventually (Chorus)

And we'll have all the time to share

All the time to share

All the time to share

We'll have all the time to share

All the time to share

All the time to share

I'm just one step away

You're just one breath away (Verse 3)

I've seen a hundred smiles

And tears that speak

Of a thousand lonely faces

Down a million empty streets

And on the coldest nights

You know I won't freeze

Coz' somewhere in the distance

There's a flame that burns for me (Chorus) (Bridge)

And I'm just one step away

I'm just one step away from you

From you (Chorus)
