## My Girlfriend's Girlfriend

## **Type O Negative**

It's no secret we're close As sweaty velcro Like latex, fur and feathers Stuck together nowIn their '62 'vette Sharing one cigarette In a black light trance then Go, go dance then Go, go trance then They keep me warm on cold nights We must be quite a sight In our meat triangle All tangled, wowMy girlfriend's girlfriend She looks like you My girlfriend's girlfriend She's my girl tooHer and me, and her and she, and me An uncrowded couple, are we three? Hey, we don't care what people say When walking hand in hand down Kings highway Two for one todayMy girlfriend's girlfriend She looks like you My girlfriend's girlfriend She's my girl tooMy girlfriend's girlfriend She looks like you My girlfriend's girlfriend She's my girl
