I Will Be There

Nellie McKay

Been working a long long time, see her in the news Calling her on her crime but she can't refuse 'Cause she'd quit it if she could, knowing that she should But admitted she's alright, gotta keep the fight onAnd so she cries Through weary eyes, we seeI don't have to have you but you know I want you And you know I'll love you and so I care But if you won't have me and if you won't see me If you ever need me, I will be there Been working a long long day, now it's getting dark April is on the way, see you in the park 'Cause she'd make it if she could, knowing that she should But she's taken up above, keep on fallin' in love, ohAnd so she cries Through wary eyes, we seeI don't have to have you but you know I want you And you know I'll love you and so I care But if you won't have me and if you won't see me If you ever need me, I will be thereI don't have to have you but you know I want you And you know I'll love you and so I care But if you won't have me and if you won't see me If you ever need me, I will be there
