

# Late Night Grande Hotel

[Nanci Griffith](#)

I'm working on a morning flight to anywhere but here  
I'm watching this evening fire burn away my tears  
All my life I've left my troubles by the door  
Leavin' is all I've ever known before  
It's not the way you hold me when the sun goes down  
It's not the way you call my name that left me stranded on the ground  
It's not the way you say you hear my heart when the music ends  
I am just learning how to fly away again  
It's not the way you say you hear my heart when the music ends  
I am just learning how to fly away again  
And maybe you were thinkin'  
That you thought you knew me well  
But no one ever knows the heart of anyone else  
I feel like Garbo in this late night Grande hotel  
Cause living alone is all I've ever done well  
It's not the way you hold me when the sun goes down  
It's not the way you call my name that left me stranded on the ground  
It's not the way you say you hear my heart when the music ends  
I am just learning how to fly away again  
It's not the way you say you hear my heart when the music ends  
I am just learning how to fly away again  
And maybe you were thinkin'  
That you thought you knew me well  
But no one ever knows the heart of anyone else  
I feel like Garbo in this late night Grande hotel  
Cause living alone is all I've ever done well  
It's not the way you hold me when the sun goes down  
It's not the way you call my name that left me stranded on the ground  
It's not the way you say you hear my heart when the music ends  
I am just learning how to fly away again  
It's not the way you say you hear my heart when the music ends  
I am just learning how to fly away again  
And maybe you were thinkin'  
That you thought you knew me well  
But no one ever knows the heart of anyone else  
I feel like Garbo in this late night Grande hotel  
Cause living alone is all I've ever done well
