

Beyond the Sun

The Space Brothers

Speak to me so I can understand your tongue

You seem rather fragile

It's been said, it's cold beyond the sun

Have you ever been there?

Communicating thoughts of ways

To never have to speak again

Let me be the fire in your head

Bring what's yours, I'll take what's mine

And meet you on the other side

We'll leave a sun so anyone can find us

A better place, a sweeter time

We won't need any wings to fly

A place beyond the sun

Look for me the way you would if you were blind

Don't be so resistant

I've been known to travel much too fast

Is that you in the distance?

Communicating thoughts of ways

To never have to speak again

Let me be the fire in your head

Bring what's yours, I'll take what's mine

And meet you on the other side

We'll leave a sun so anyone can find us

A better place, a sweeter time

We won't need any wings to fly

A place beyond the sun, sun

Communicating thoughts of ways

To never have to speak again

Let me be the fire in your head

Bring what's yours, I'll take what's mine

And meet you on the other side

We'll leave a sun so anyone can find us

A better place, a sweeter time

We won't need any wings to fly

A place beyond the sun, sun
