

Ghost

Skid Row

I feel the things I said
But never said how I felt
I know I waited much too long Could I get it in your head
Without a hit below the belt
Looking back it seems that I
Went about it all wrong Lying alone in the bed we made
Watching headlights on the shade
The ghost that's sleeping by your side
Are my promises to you that died
To you that died Was it long ago
When forever was our friend
But now freedoms what I feel inside It hurts so much to let you go
To know we'll never touch again
When I walk if I fall down
Can I take it in stride? Lying alone in the bed we made
Watching headlights on the shade
The ghost that's sleeping by your side
Are my promises to you that died
To you that died I might let you go but I'll never go away
I might let you go but I'll never go away, yeah I feel the things I said
But never said how I felt
I know I waited much too long Lying alone in the bed we made
Watching headlights on the shade
The ghost that's sleeping by your side
Are my promises that died Lying alone in the bed we made
Watching headlights on the shade
The ghost that's sleeping by your side
Are my promises to you that died
To you that died
To you that died
