

# Block Out the World

Maxeen

There's a clash of information between my ears  
I'll shut off my eyes in hopes, it disappears  
Jammin' ideas down my throat  
So I swallow the belief that we're on  
Some secret roads So I block out the world with headphones on  
It's the only thing I can do  
When I don't wanna talk to no one  
Block out the world with headphones on  
It's my only escape I'm losing you in trust but I can't help but feel  
That what you say is not, it's not what's real  
I wanna feel the case but the facts aren't straight  
And if I think you're guilty, I won't participate So I'll block out the world with headphones on  
It's the only thing I can do  
When I don't wanna talk to no one  
Block out the world with headphones on  
It's my only escape I'll block out the world with headphones on  
It's the only thing that works  
When I don't wanna talk to no one  
Block out the world with headphones on  
'Cause I don't understand Block out the radio, block out the TV show  
Block out these visions that trouble me so  
I feel sick again, my blood is running thin  
Digesting too much of your negative information  
Digesting too much of your negative information Block out the world  
Block out the world  
Block out the world Block out the world with headphones on  
It's the only thing I can do  
When I don't wanna talk to no one  
Block out the world with headphones on  
It's my only escape Block out the world with headphones on  
It's the only thing that works  
When I don't wanna talk to no one  
Block out the world with headphones on  
'Cause I don't understand And what would happen if we all stopped buyin'  
And to the fear that the selling is weak  
These losers scratch their heads in confusion  
This is how the strong become the meek Block out the world  
Block out the world  
Block out the world

Block
