

Music Feels Better

Selena Gomez

All I need is love
That's what you give, I'm taking it tonight
All I need is touch
That's what I feel when your skin's on mine And with you the music is better
Just want us to be together, 24/7
And now that the color's brighter
'Cause you set me up on fire The music feels better with you
So much better with you
The music feels better with you
So much better with you
The music feels better with you
The music feels better with you All I need is true
That's what you are
When everything's a lie
All I need is here
Right where you are, you're every reason why And with you the music is better
Just want us to be together, 24/7
And now that the color's brighter
'Cause you set me up on fire The music feels better with you
So much better with you
The music feels better with you
So much better with you
The music feels better with you
The music feels better with you And with you the music is better
Just want us to be together
And now that the color's brighter
'Cause you set me up on fire
'Cause you set me up on fire, fire
'Cause you set me up on fire The music feels better with you
So much better with you
The music feels better with you
So much better with you
The music feels better with you
The music feels better with you
The music feels better
