

Machine

Static-X

I see your bleeding dark side
I feel your angry heart
Reveals forbidden places
More monster yet alive(No faith)
Changing into something less than human
No longer part of this
(The influence)
Changing into something less than human
No longer part of this machine(No mind)
Changing into something less than human
No longer part of this machine
(It's chemical)
Changing into something less than human
No longer part of this machineGet into my hidden demon
Get out of my swollen head
Shines down on blackened faces
Changing at your expense(No faith)
Changing into something less than human
No longer part of this
(The influence)
Changing into something less than human
No longer part of this machine(No mind)
Changing into something less than human
No longer part of this machine
(It's chemical)
Changing into something less than human
No longer part of this machineYou ain't no longer part of this
You ain't no longer part of this
You ain't no longer part of this
You ain't no longer part of thisYou ain't no longer part of this
You ain't no longer part of this
You ain't no longer part of this
You ain't no longer part of this(No faith)
Changing into something less than human
No longer part of this
(The influence)
Changing into something less than human
No longer part of this machine(No mind)
Changing into something less than human

No longer part of this machine
(It's chemical)
Changing into something less than human
No longer part of this machine(No faith)
Changing into something less than human
No longer part of this
(The influence)
Changing into something less than human
No longer part of this machine(No mind)
Changing into something less than human
No longer part of this machine
(It's chemical)
Changing into something less than human
No longer part of this machine
