

# In Some Room Above the Street

Gary Stewart

There's no place for us to hide  
In the neon world outside  
So I suppose we'll always meet  
In some room above the street

The city lights glow on the shelf  
But they can't find a love that lives  
Its strange that love could come so sweet  
In some room above the street

In some room above the street  
Like thieves and beggars when we meet  
Awake before the break of day  
And like the night we steal away

And I can make it through the hours  
I spend with mine and you with yours  
'Cause when I close my eyes I see...you  
In some room above the street

In some room above the street  
Like thieves and beggars when we meet  
Awake before the break of day  
And like the night we steal away

But if he wants your love tonight  
Don't turn away, don't hurt his pride  
Close your eyes and think of me  
In some room above the street
