

# Lonesome Highway

Solomon Burke

I tried so hard to be your man  
I put my future in your hands  
And I've gone a million miles  
To reach your arms And I did all that I could do  
But all I did to ya was to worry you  
And now today I hear you say  
That we must part, that we must part But when you get out on that highway  
And the blues start coming down  
Then you'll see just how lonesome  
Life can really be, life can really be Well, then I hope you meet somebody  
And they dodge your heart around  
Then you cry and wish that you  
Were back with me, back with me I know that love is never fair  
And if you call me, baby I'll be there  
Just like a fool I'll always be  
In love with you Baby, baby but when you get out on that highway  
And the blues start coming down  
Then you'll see just how lonesome  
Life can really be, life can really be Well, then I hope you'll meet and need somebody  
And they'll dodge your poor heart around  
Then you cry, cry, cry and wish that you  
Were here with me, were here with me I know that love is never, never, never fair  
But if you call me, baby, trust me, I'll be there  
Just like a big old fool  
I'll always be still in love with you Yeah baby, no matter what you do  
I really love you
