

Abilene

Science!

Something's goin' on, I don't know what it is
But my phone just rang and I didn't get no call
 No call, just waiting here
 Abilene, it's got a lot of what you don't need
 It's got lots of space, still nothing seems misplaced
 You've got a face, you are spacey
 You got to take it as it comes to you
 Don't need no act of contemplation
 Just keep it off your wasteful way for now
 It's not you who has got to change
 It's not your way at all, it's got to be you
 It's got to be you, the look in your eyes
 The feel of your body close to me
 It's got to be you

Who tells me the world would spin away without love
You, reason, oh, reason for being once more together
 It's got to be you
 It's got to be you, the look in your eyes
 The feel of your body close to me
 It's got to be you
Who tells me the world would spin away without love
You, reason, oh, reason for being once more together
 It's got to be you
 It's got to be you
 It's got to be you
 It's got to be you
