

Angeldust (Please Come Down)

Jump, Little Children

The islands off the coast are on fire
Yellow and crimson
Just beyond calico beach
The fire's ascension
Of gasoline
Burned red and green
Is like the blazing corona
Of a midnight sunUnder the angeldust
And the terminus
The heavens have already been turned
Caught in the circling eye
Of a cloudy high
Is the feeling that I'm gonna get burned (yeah...)The islands off the coast are on fire
Orange and violet
Standing on a thundering beach
Frozen in silence
The rising sounds
Of burning ground
Is like the carbon echo
Of a smoking gunUnder the angeldust
And the terminus
The heavens have already been turned
Caught in the circling eye
Of a cloudy high
Is the feeling that I'm gonna get burnedJust beyond the solution
Of rolling seas and pollution
Salted hands
Salted lashes
Salted wings
Turned to ashesPlease come down
Please come down
Please come downStanding on a turpentine beachThe sky's growing blacker
The imagery
Seems clear to me
A glowing symbol of danger
On the horizonUnder the angeldust and the terminus
The heavens have already been turned
Caught in the circling eye of a cloudy high
Is the feeling that I'm gonna get burned

Is the feeling that I'm gonna get burnedPlease come down
Please come downPlease come down
Please come downPlease come down
Please come down
