Shadows

Rufus Wainwright

Who will keep, keep me in this evening?
Even though they are not here with me
I could be a great star, still I'm far from happyFinally, feel the world around me
Fighting through, fighting through the whiskey
I could be a great star, still I'm far from happyOut of these shadows comes the light
Shadows comes the lightYou will keep, keep me in this evening
Even though you are not here with me
I could be a great star, still I'm far from happyI could be a great star, I could be a great star
I could be a great star, I could be a great starOut of these shadows comes the light
Out of these shadows comes the light
Shadows comes the light
