

# Tabula rasa

## Esence

The kid next door is defective  
The trees are rotting and bending to the ground  
    Watch the untainted innocence  
    Collapse into lewd misfortunes  
And I swear but the truth feels so empty  
And I run but there's darkness everywhere  
    Paralyzed, you can't see  
    Paranoid, you can't sleep  
    Through the lies that surround you  
    Paranoid, what you can't see  
    Paralyzed, is your disease  
    Hypnotized, is all around you  
    I'm at least half a mile away  
But much further than I ever thought I'd be  
    To finding my way out of this hole  
    But the darkness here is so soothing  
And I swear but the truth gets me nowhere  
And I run but there's temptations everywhere  
    Paranoid, you can't sleep  
    Paralyzed, you can't see  
    Through the lies, that surround you  
  
    Paranoid and you can't see  
    Paralyzed but your disease  
Hypnotized was everything about you  
    Substance seals leaks in you  
    Damaged ship, so we sink  
    Right before my eyes  
But it's putting out the fire well  
    Carnage lights  
Up the sky but it's just as well  
    No one's fine  
    Sinking into darkness  
    It's no surprise  
    Paralyzed, you can't see  
    Paranoid, you can't sleep  
Through the lies that surround you  
    Paranoid, what you can't see  
    Paralyzed, is your disease

Hypnotized is everything, was everything about you  
But you can't taste it  
'Cause you'll just waste it
