Never

JTR

I guess you told another lie,
Cos you've been on your own tonight,
There's something missing in your eyes, I think you know it,
And everything you say to me,
I listen, but I can't believe,
What you were giving in, and can't see,
What he's doing,Don't be scared to fall apart, I know the futures brighter,
Take control over your heart,
Before he takes it from you,I know he almost left you in the dark,
And I would never, never,
I know that he was holding back his heart,
And I would never, never,
I stand with you, I fall with you,
And I would do it so much better,
If I had you we would never ever be apart,
Know I would never, never,Don't be another name on his list,
Cos you never have to feel like this,
Your worth so much more than this, I think you know it,Don't be scared to fall apart, I know the futures brighter,
Take control over your heart,
Before he takes it from you,I know he almost left you in the dark,
And I would never, never,
I know that he was holding back his heart,
And I would never, never,
I stand with you, I fall with you,
And I would do it so much better,
If I had you we would never ever be apart,
Know I would never, never,
Know I would never, neverHey, I know it's really hard,
To hold onto your heart, hold onto your heart,
You gotta let it go,
To get a brand new start, to get a brand start,I know he almost left you in the dark,
And I would never, never,
I know that he was holding back his heart,
Know I would never,I know he almost left you in the dark,
And I would never, never,
I know that he was holding back his heart,
And I would never, never,
I stand with you, I fall with you,
And I would do it so much better,

If I had you we would never ever be apart,
Know I would never, never,
And I would never, never
Know I would never, never
Ooooh, oooh
Know I would never, never
