

All In My Head

Rayland Baxter

I remember the day I met you
Now I cannot forget
Every hour you'd appear
While I was melting in the rain
So I called you but you don't hear me
And I showed up but you weren't there Was it all in my head?
Was it all in my head? I was floating through the air
I was floating through the breeze
I could hear you from a distance
And i could see you standing there
Like a roamer in the moonlight
I was sure to be your friend
Was it all in my head?
Was it all in my head? No I don't ever wanna wake up again
No I don't ever wanna wake up again
Cause I just wanna keep on dreamin'
I just wanna keep on dreamin'
All the gold rings that I sent you
With your name engraved inside
And the diamond from my grandmother
That she left me when she died
When you wear them do you feel rosie?
When you wear them you must be mine
Cause it's all in my head
Was it all in my head?
Oh, it's all in my head In my head
In my head
