Water

Remy Zero

Lost course on the summer sun by his pride
I was fearless too long inside to hide
So goodbye, so goodbye
All life turns to words
But just the sounds
All the names are changed around
She cares
(Straight from the radio right to your mouth)
She cares
(Started special time, lost all control of it)
She cares
(So far from everyone, too far from everything at all)
(Gone is all concern)
I must begin
Set in a course away
So then, why do you fall down?
All those wrecks you so call sounds
From these things that I saw for days
And it's here in song, always
Down on yourself once again
Where have you been?
The form is up and it takes you out
Away
(Straight from the radio right to your mouth)
Away
(Started special time, lost all control of it)
Away
(So far from everyone, so far from all of it)
I was here all day
(Gone is all concern)
I must begin
Set in a course away
So then, why do you fall down?
All those wrecks you so call sounds
From these things that I saw for days
And it's here in song, always, always
For always, for always
For always, for always
