

# One More Mouth

[Josh Ritter](#)

Honey how you gonna make it on your own? Honey how you gonna make it on your own? When you wake up  
in the night And see the stars just city lights And you can't find home?

You act like you don't need nobody else And you dance like you don't need nobody else And all the other  
moths need light To circle round while you just fly Around yourself

Oh I stir my sugar with a spoon And watch your white dress float around the room I try to see what you're  
about But even my candles are down and out

Honey why you gotta hide your face from me? Honey why you gotta hide your face from me? Will I starve in  
this eclipse while you treat every hungry kiss Like one more mouth to feed?
