

Cry

Def Leppard

Here comes the flood
Can you feel the love?
Washing over you
Like a tidal wave inside of you
Here comes the night
Can you see the light?
Shining like the sun
You wanna hide but it's got you on the run
Every word you say
Is taking your breath away
Cry, the demons that you hide
Screamin' through the night
They won't forget you
Coming down, coming down
Coming down, coming down
Need, the circus you gotta feed
The wound that never heals
It don't let go
Coming down, coming down
Coming down, coming down
She's here again
Your only friend
Watchin' over you
She never takes her eyes away from you
She's wide awake
As she lies in wait
Your chosen bride
A mother, a lover, a kick inside
Every single day
Is taking your breath away
Cry, the demons that you hide
Screamin' through the night
They won't forget you
Coming down, coming down
Coming down, coming down
Need, the circus you gotta feed
The wound that never heals
It don't let go
Coming down, coming down

Coming down, coming down
It's been so long
Since I've come undone
Slippin' in to my second skin
To my second skin
Cry, the demons the hide
Screamin' through the night
No, they won't forget you
Coming down, coming down
Coming down, coming down
Need, the circus you gotta feed
The wound that never heals
It don't let go
Coming down, coming down
Coming down, coming down
