

Singing Over Me

Building 429

In the middle of the night when I finally closed my eyes
With the memory of today running circles in my mind
The voice I can't foresee is, is whispering to me
Putting all my fears to rest
Yeah they put 'em all to rest And then I realize that you're with me, yeah on my side
When I stand, when I fall
When the lines go off You, you're singing over me, you're singing over me tonight
With all the stars that's in this midnight sky
And you, you're singing over me, you're singing over me tonight
And my heart is overcome with a song, with a song, yeah And from the depths of my soul you are calling me
To the evidence of you and all your glory
From the hours of the night to the mountains majesty
Putting all my doubts to rest Yeah, then I realize that you're always by my side
Yeah, and my words can dance to this beating chance
When I live and die, I'm always finding you You're singing over me, you're singing over me tonight
With all the stars that's in this midnight sky
And you, you're singing over me, you're singing over me tonight
And my heart is overcome with a song, with a song, oh You, you're singing over me, you're singing over me
tonight
With all the stars that's in this midnight sky
And you, you're singing over me, you're singing over me tonight
And my heart is overcome with a song, with a song, yeah I'm singing out loud
Yeah, I can hear it
Yeah, I'm singing out loud
