Jowls

Buckethead

Save me the slunk
Save me the slunk, Save me the slunk
Save me the slunk
They take the noggin, and they cook it down except for the laryngx, and they tear all the chunks away from the bone. They use a grab bag, they don't throw nothin' away. They use the jowls, and the sheiks, and the collar, and the eyeballs, and the tendons, and the sniffer, and the mouth meat, and all the flesh and boil it down to a big jelly of fat. It's really good. You like it?
Yea, I like it, it's good.
Save me the slunk
