Same Old Place

Newfound Road

Written By Time Stafford

Seems I'm always looking for the chance to move along,
Can't settle down, don't know what I'm running from
But I always come to you
The same old way I always do.

Still In the same old place
I've really always been
Sure good to see your face
Heaven knows I need a friend
Never afraid to hold me or catch me when I fall
Still in the same old place after all.

Once upon a time I knew every rock here in this yard
Can't tell it now but back then it seemed so hard
to walk the mile and a half to school
Just to learn some golden rule

It's still the same old place I remember as a kid
I show the feelings in my face even some I thought I'd hid
You can bury all your memories but they won't stay down for long
It's still the same old place after all.

I don't remember writing on the wall
How could it come so quickly down to nothing at all
Still in the same old place
that we always use to go
Sure would like to see your face you know the time's been passing slow
I thought that I could forget you and some how move along
I'm still in the same old place after all
Still in the same old place after all, after all.....
