

World Invitational

Rival Schools

Inside, inside it feels like you know one
It's fine, you thought you raided with caution
Started thinkin' it's all your fault
Can't salvage your damaged goods
Or solve all these problems we have
The problems we only imagine And the world's invitation waitin' for your call
Leave your own limitations, no one cares at all This is no special occasion
This will turn out the way it should be
Insecure, listen to me
We'll solve these problems we have
The problems we only imagined And the world's invitation waiting for your call
Leave your own limitations, no one cares at all
Save for people you know, it's hardest to let go
