

# Scott Baio

## Unit 3 With Venus

There we were, we stood in line, I always thought that you were fine  
We had to wait an hour or two, but it was worth it to see you  
They finally let us through the door, I never felt like that before  
When you stepped into the light, you took away our hearts that night

As you sang your song up there, some girl had thrown a teddy bear  
Then you really made me sick, you gave that teddy bear a kick!  
Then you pushed me back at you right now, fast and free  
I thought that you did it all just for me!

'Til you kicked that little teddy bear, OH NO! (3X) Live in concert - Scott Baio  
[ending-spoken:] Scotty, when you kicked that bear, you broke a heart
