

Summer

Beatsteaks

We burned the summer down
There's dust when we're around
It's done this afternoon
We came right back from moon We paint the town red
To see what we will get
Don't care about the past today
We'll make it last We came around
Breaking up the silence
That we've found
And I'm alive There ain't no place to stay
So watch our tail lights fade
The way it's said and done
It leads to where I'm bound
