

I Get My Beat

Richard Ashcroft

I get my beat with you
When we see things through
And I think about you all the time Who the winners in the game were playing
I don't even think they know
Who the losers and how much their paying
I don't even think they know I need to hear the truth
From the soul of you
Chase the moments we can share Who the winners in the game were playing
I don't even think they know
Who the losers and how much their paying
I don't even think they know They got time
They got life
Take and take your time I got to hear the sound of the morning song
It's the right place with your head
I'm blowing smoke and I'll feel so damn fine
I know you care Who the winners in the game were playing
I don't even think they know
Who the losers and how much their paying
I don't even think they know
