

Machine

Pandorum

Do you feel like a stone, Sinking on your own
Through the chapters of your story, The calm before the storm
Are you stuck in a rage, That even you can fake
From whats burning deep inside, I open up my eyes

And I'm strong, Your words will not break
A Machine is what you've made
Rushing to disarm, I'll carry on
And through this battlefield, Without you I stand Free
Fear is here and gone, I'll carry on

But I still hear you calls, For a reason to hold on
I've become numb, So Numb

I'll turn away
