Too Young For This Love

The Icarus Account

We were 18 and everyone
Was telling us to have our fun
You've got nothing but time
But we were falling hard and falling fast
For love had taken over us
And when you're young you never know
If love will come or love will go by
April days they turned into May's
And we knew that we didn't have long
Like the song that was sung
When we danced at the prom
It was over before we'd begun
We were just a little too young for this love
We were just a little too young
We would meet up in the parking lot
Shortly after school was out
Even in the largest crowds
I'd pick you out I picked you out
We'd talk about the college days
The distance that would separate
And all the songs I'm gonna listen to
When you're gone and I'm thinking about you

April days they turned into May's
And we knew that we didn't have long
Like the song that was sung
When we danced at the prom
It was over before we'd begun
We were just a little too young for this love
We were just a little too young
If love hasn't found you yet
Don't be afraid and please don't fret
You've got nothing but time
And somewhere down the road
Maybe in a year or so
I'll get another chance
To dance with you and tell you that you're mine
April day's still turn into May's
But we know we've got nothing but time

And song that was sung
While the wedding bells rung
It'll play for the rest of our lives
We were just a little too young for this love
We were just a little too young
And you're never gonna know just where life's gonna go
But that's fine as long as you're by my side
