

What's the Altitude

Cut Chemist

This is going out
To
The fabulous weeze
Come on
Hey(i know what you can do
Let us play the part for you)
Are ya ready to party?
Yea
All rightWe made the perfect day when
We played the (night and sun)
She said she couldn't stay when
Her night had just begun
She wanted me to know what,
She didn't know herself
Said I was one among others
Hey now that's somethin' elseShe played a vocal mission
I played the cosmic (heart)
Wanted to paint her picture
She said don't even startShe said loves like a drug and
That this was chemistry
But with these chemicals then
How is this good for me?Her life gets better she read
Her (man goes out of his head)
Like birds of a feather so we bled
Lets go together then she saidSo whats the altitude
I said its out of sight
Whats with the attitude and,
She said its all right
So whats the altitude
I said its out of sight
Whats with the attitude and,
She said its all rightShe said lets get away now
Lets go down by the bay now
She turned her (hair) my way now
Watch out, what you say now?Now the things you've been through make it seem like
Nothing could ever really last forever but if you try,
Girl we can do some thingsShe gave me headphones
Said have you heard this sound?
I think I've heard this one it's

Totally underground and
I wouldn't let her go then
She wouldn't let me go
Just ask the neighbors man
It's, unbelievable I played the mornin' risin'
She played the setting sun
She said she couldn't stay when
Her night had just begun So what's the altitude
I said it's out of sight
What's with the attitude and,
She said it's alright
So what's the altitude
I said it's out of sight
Without a band an
We dance we party all night We party all night
We party all night
We party all night We made the perfect (day) when
We played the (night and sun)
She said she couldn't stay when
Her night had just begun
She wanted me to know what,
She didn't know herself
Said I was one among others
Hey now that's somethin' else We played the vocal mission
To play the cosmic (style)
How can we make the distance
You've always known (by eye)
Were letting people know what
We now know ourselves
Now we are one among others
Hey now that's something else She gave me headphones
Said have you heard this sound?
You know I've heard this one girl
Let's get outta town
This love is like a drug an
We bonded chemically
We're letting you know better
Livin' through chemistry
