

# Road To Paradise

Jordin Sparks

Handshake, try to keep 'em steady  
Won't break, you been getting ready  
Here we go it's time to say goodbye  
You've got a lot up on your shoulders  
Not quite sure just where you're going  
But you know it's gonna be quite a ride  
You know with every twist, turn, crash and burn  
That you're gonna reach the other side  
You will do things you never dreamed of  
You're gonna find a few new friends  
Get to explore the worlds of wonder  
Where the magic never ends  
Time to go out and make your moment  
Make a few memories on the way  
Life is unfolding, it's happening right before your eyes  
On the road to paradise, road to paradise  
Inside you feel the fire blazing  
Outside you are so amazing  
Take a breath and soak in all the sides  
Danger and fear are gonna test you  
Still you are coming to the rescue  
Rain or shine, you won't give up the fight

It doesn't matter how long how far  
There are miracles along the way  
You will do things you never dreamed of  
You're gonna find a few new friends  
Get to explore the worlds of wonder  
Where the magic never ends  
Time to go out and make your moment  
Make a few memories on the way  
Life is unfolding, it's happening right before your eyes  
On the road to paradise  
Might be surprised  
By the strength you're gonna find  
Inside your heart  
You will do things you never dreamed of  
You're gonna find a few new friends  
Get to explore the worlds of wonder

Where the magic never ends  
Time to go out and make your moment  
Make a few memories on the way  
Life is unfolding, it's happening right before your eyes  
On the road to paradise, on the road to paradise  
Yeah, on the road to paradise
