

Where's That Rainbow?

Barbra Streisand

Troubles really are bubbles they say
And I'm bubbling over today
Spring brings roses to people you see
But it brings hay fever to me
My luck will vary surely
That's purely a curse
My luck has changed,
Yes it's gotten from rotten to worse
Where's that rainbow you hear about
Where's that lining they cheer about
Where's that love nest where love is king ever after
Where's that blue room they sing about
Where's that sunshine they fling about
I know morning will come but pardon my laughter
In each scenario you can depend
On the end where the lovers agree
Where's that lutherio
Where does he roam with his dome
That's as lean as can be
Oh, it is easy to see alright
Everything's gonna be alright
Be just dandy for everybody but me
In each scenario you can depend
On the end where the lovers agree
Where's that lutherio
Where does he roam with his dome
That's as lean as can be
Oh, it is easy to see alright
Everything's gonna be alright
Be just dandy for everybody but me
Oh yeah, I see that rainbow
For everybody but me
