

Dream Big (Movie Version)

[Katrina Elam](#)

There comes a time in every bodies life
When your destiny is born
There's no doubt what you're all about
Is there without a warning When it comes you gotta take it
And believe you're gonna make it through
There's not a challenge you can't face
There's not a rainbow you can't chase Dream big, reach high
Don't ever be afraid to spread your wings and fly
With a heart full of faith
A whole lotta luck and some love to see you through
Dream big and it just might come true Always know what the future holds
Is in the hands of fate
And don't forget that when times get tough
The gift is worth the wait And when it finally comes together
Your star will shine forever more
And it could give hope to all the rest
Show them how to be the best Dream big, reach high
Don't ever be afraid to spread your wings and fly
With a heart full of faith
A whole lotta luck and some love to see you through
Dream big and it just might come true Oh, with a heart full of faith
A whole lotta luck and some love to see you through
Dream big and it just might come true
