Waiting For You

Thirsty Merc

So much static on our screens
So many words that no-one means
Mention the lessons and mistakes
Never a heart that never breaksDoes the hysteria get you down
It's easy to find that in this town
A glimmer of hope you brought my way, yeah
But I'll never feel your love todayAnd that's what I fail to understand
How I can take this like a man
All of the things you'd rather do
When you know that I'm waiting for youMaybe these things I fail to see
Maybe I'm caught up in mystery
All I can say this much is true
You know that I'm waiting for youWe have a fever that isn't there
Burning our minds in solitaire, yeah
But we're too busy making friends
It's easier watching through the lensAnd that's what I fail to understand
How I can take this like a man
All of the things you'd rather do
When you know that I'm waiting for youMaybe these things I fail to see
Maybe I'm caught up in mystery
All I can say this much is true
You know that I'm waiting for you
You know that I'm waiting for youAnd that's what I fail to understand
How I can take this like a man
All of the things you'd rather do
When you know that I'm waiting for youMaybe these things I fail to see
Maybe I'm caught up in mystery
All I can say this much is true
You know that I'm waiting for you
You know that I'm waiting for you
You know that I'm waiting...
