

Dream the Dream (2009 Remaster)

UFO

Mama they say the snow this winter
Beat you to the ground
But I'm a long time gone, long time gone
Wish I could see the blazin' sunset
Falling right into the bay
But I'm a long time gone, long time gone To dream the dream that's over
To live and love again, oh my America
And to be where my footsteps lead me over
To be born again tonight I want to be there on our back porch
Looking on down the road
But I'm a long time gone, long time gone
The troubles here, they pass me by
I want to get home to you
But I'm a long time gone, long time gone To dream the dream that's over
To live and love again, oh my America
And to be where my footsteps lead me over
To be born again tonight Lonely days, lonely nights
Caught up in someone else's fight
I'm holdin' on and you're so strong
All I want to be is just holdin' you tonight To dream the dream that's over
To live and love again, oh my America
And to be where my footsteps lead me over
To be born again tonight To dream the dream that's over
To live and love again, oh my America
And to be where my footsteps lead me over
To be born again tonight
