

Speaking In Tongues (feat. Stacy Michelle)

Meat Loaf

For the mighty oak to grow
You got to plant a tiny seed
Words are all you know
Body language is what you need Now I can barely breathe
Your fragrance fills my lungs
It's time we started speaking in tongues
Speaking in tongues It's time to start a fire
And I know we'll make it good
We're overflowing with desire
You got the spark -- I got the wood We got let our voices soar
More than any song we've ever sung
It's time that we start speaking in tongues
Speaking in tongues There are things we learn by knowledge
There are things we learn by heart
There are things we learn at the end of life
There are things we learn at the start There are things we learn by science
There are things we learn by art
There are things we learn from the fires of love
An erection of the heart
An erection of the heart There are things we learn by knowledge
There are things we learn by heart
There are things we learn at the end of life
There are things we learn at the start There are things we learn from science
There are things we learn from art
There are things we learn from the fires of love
An erection of the heart
An erection of the heart For a mighty oak to grow
You got to plant a tiny seed
Words are all you know
Body language is what you need We got to let our voices soar
More than any song we've ever sung
It's time that we start speaking in tongues
Speaking in tongues
