Truce

The Dresden Dolls

You can have Washington, I'll take New Jersey

You can have London but I want New York city

I should get Providence, I've got a job now

Los Angeles obvious that's where you belong nowYou can have Africa, Asia, Australia

As long as you keep your hands off Cafe Pamplona

We can split Germany right down the middle

You'd hate it there anyway, take Berlin and we'll call it even You can have all of the carry-on baggage

I'll trade the saskia jokes for the alphabet language

On special occasions, we'll split between parents

Who forced us to hate them on alternating weekends You call it over and I call you psycho

Significant other just say, we were lovers

And we'll call it even, we'll call it evenI am the ground zero ex-friend you ordered

Disguised as a hero to get past your borders

I know when I'm wanted, I'll leave if you ask me to

Mind my own business and speak when I'm spoken toI am the tower around which you orbited

I am not proud, I am just taking orders

I fall to the ground within hours of impact

I hit back when hit and attack when attackedYou get Route 2 between Concord and Lexington

I want mass ave from the square to my apartmentAnd if we should meet through some misunderstanding

I'll be very sweet, very patient and forgiving

Now get off my side of the stateAnd if we should see one another in passing

Despite these techniques there is sometimes no avoiding

There must be some kind of mistakeWe'll raise high our white flags and bow heads and shake hands

Declaring the land, we're on un-American

We'll call it even, we'll call it even am the tower around which you orbited

I am not proud, I am just taking orders

I fall to the ground within hours of impact

I hit back when hit and attack when attackedAnd I am an accident waiting to happen

I'm laughing like mad as you strangle the captain

My place may be taken but make no mistake

From a little black box, I can say without shameThat you've lost, that you've lost

Do you know what you've lost? So take whatever you'd like, I'll strike like the states on fire

You won't sleep very tight, no hiding no safe covers

Make your bed and now lie just like you always do

You can fake it for the papers but I'm on to you, I'm on to youTake whatever you'd like, I'll strike like the

states on fire

You won't sleep very tight, no hiding no safe covers

Make your bed and now lie just like you always do

You can fake it for the papers but I'm on to you, I'm on to you

I'm on to you, I'm on to youAmanda, you're telling me a fairy tale
