

Fear In America

Brown Floyd

Living in oppression at the hands of tyranny
slaves for the warlordsFear in America....

Don't look over your shoulder

Your neighbors watching you

They're coming on up and get youFear in America...military industrial complex they'll take all you've got
they're gonna run with your loaded gun yeahOne nation living in oppression

One nation bowing to the needs of the few

One nation no longer sacred

One nation under tyranny

One nation no longer sovereign

Industrial war machine

Fear in America

they're gonna lock you away for no reason

they're gonna shoot your mother
