

# California Queen

## Wolfmother

Slipped off into the slip stream  
She's looking for the summer dream  
Came down from the mountain  
To find another machineRunning down all the byways  
Listen to all that she says  
Couldn't see very far  
Find out all that you are, my California queenFully air-reconditioned  
Self-made man machine  
With a homemade hydroponic  
Way to find out what it means, my California queenStanding in front of the rainbow  
Could you tell me where do all the people go?  
Rising from the mystic haze  
Standing in front of all creationWith all their mystic ways they seem to control the days  
Somebody got to get behind it  
To find out all that it means, my California queen  
Oh, tell me what it means, my California queenStanding in front of the rainbow  
Could you tell me where do all the people go?  
Rising from the mystic haze  
Standing in front of all creation
