

# Persecution

## Judas Priest

We're watching you  
Nowhere to hide  
Obey the holy law  
Repent for your sins  
There is but one God Against their holy laws  
I'll do whatever it takes  
I've met their kind before  
We're martyrs burned at their stake They try to dominate  
I'll be a thorn in their side  
They underestimate  
The willpower feeding my pride Under the hand of persecution  
Defy the institution Their words just crucify  
Condemning truth that I seek  
They cannot justify  
The pain, the havoc they wreak I never will conform  
My faith is deep to the core  
I stand against reform  
I'll never kneel down before Under the hand of persecution  
Defy the institution Raised fists of fire  
As they conspire  
I'll be defiant  
Against the alliance They will not eradicate me  
Break my will or suffocate me  
I will subjugate the hate  
That they breed As the church interrogates  
I cannot see they supplicate me  
Execute and ridicule  
We're all freed I never will conform  
My faith is deep to the core  
I stand against reform  
I'll never kneel down before Under the hand of persecution  
Defy the institution  
Under the hand of persecution  
Defy the institution Persecute, you defy  
Execute, crucify, crucify  
Persecute, you defy  
Execute, crucify, crucify Persecute, you defy  
Execute, crucify, crucify  
Persecute, you defy

You survive
