

Fixed On a Pattern

The Pale Pacific

Is there a song to sing perfect for the crowded waiting room room in your ears? Dissonance is too much when the resolution can take so very long Twisted into new shapes trying to sing happy harmonies that just won't come you're equipped with only minor chords disguised as excuses, don't get me wrong don't get me wrong I've seen your problems multiply as your eyes are fixed onto a pattern that I have failed to recognize as hard as I have tried No, that's not it Play it right, again you are falling asleep while the sound still rings Your eyes are fixed onto a pattern that I could not find as hard as I *tried*
