

Step Back

Defiance

[Music: Harrington / Vander Ende]

[Lyrics: Esquivel] Step back and listen to what I say

Don't worry, put your trust in me

What to believe when your
head's overfilled with these lies

The naked truth separates the
people lost in time [Chorus:] As if

There's nothing to do

Reach back

And pull your past through

Step back and listen to what I say

[Repeat chorus] What to believe when your

head's overfilled with these lies

The naked truth separates the
people lost in time I see the future. I see your life

I see you live your life on
borrowed time

You live for your own morals

I do what I like 'cause this is my
life I do as I please

With no sacrifice

Guess what ? Step back [Repeat first verse, chorus] Step back and listen to what I say

Step back
