Drowning Pool

Right now, here I am, understand
With this comes frustration
A better way to follow through, I'm far from done
The truth is right there in front of you
A better way to follow through, I'm far from done
The truth is right there in front of me
Realize through my eyes
I can't speak, so damn weak
A better way to follow through, I'm far from done
The truth is right there in front of you
A better way to follow through, I'm far from done
The truth is right there in front of me

The face before me shows what my life will be
Everybody knows, everyone but me
A better way to follow through, I'm far from done
The truth is right there in front of you
A better way to follow through, I'm far from done
The truth is right there in front of me
Better follow
The truth is right there in front of you
Better follow
The truth is right there in front of me
